

How to replace a Borrowed Private vaccine for a VFC eligible patient

Vaccine lot accountability requires that vaccines be associated with patients. In order for this to happen, lot numbers with the correct funding source must be in the provider's Lot Inventory. When borrowing occurs, funding source integrity needs to be maintained both when the vaccine is originally borrowed and when stock is repaid.

Transfers in the Lots Reconciliation window will no longer be sufficient to track the movement of borrowed vaccine. Use the following steps to create a lot with a different funding source and to decrease doses of the lot from which vaccine was borrowed.

Do not adjust borrowed inventory from the reconciliation page.

These steps are required *in addition to* the VFC Borrowing Form to be submitted to Central Office and Field Representatives.

Part 1: Borrowed Private Dose for a VFC Eligible Patient & Adding Dose into Inventory

Anytime that you use a vaccine whether it is private or public it automatically becomes what the patient eligibility is at the time of the vaccination. Private becomes VFC for a VFC eligible patient and vice versa, VFC becomes Private for a Private pay patient.

For this example, a Private vaccine was given to a VFC eligible patient. Hib (PRP-OMP)- M034894

| Patient ID | First Name | Middle Name | Last Name | Birthday | Guardian F.N. | Phone Number | VFC Eligible | Facility |
|------------|------------|-------------|-----------|----------|---------------|--------------|--------------|----------|
| | | | | | | | YES | |

| Vaccine | Vacc. Date | Dose Size | Mfg. Code | Lot | Funding | VFC Eligible | Historical | Decrement | Vaccinator | Facility | Date VIS Form Given | VIS Publication Date |
|--------------------------------|------------|-----------|-----------|---------|---------|--------------|------------|-----------|------------|----------|---------------------|----------------------|
| Hep A, ped adol, 2 dose | 02/16/2017 | Full | MSD | M036458 | PUB | YES | N | Y | | | 02/16/2017 | 07/20/2016 |

[Back](#)

6. The newly created lot is now available to be associated with a patient vaccination.

If you are not able to enter a borrowed dose before your EMR system uploads the information to CHIRP, you will need to associate the borrowed dose with the patient.

If you are manually entering doses, skip step 2.

Step 2: Associate Newly Added Public Dose to VFC Eligible Patient

| Patient ID | First Name | Middle Name | Last Name | Birthday | Guardian F.N. | Phone Number | VFC Eligible | Facility | | | | |
|--------------------------------|------------|-------------|-----------|----------|---------------|--------------|--------------|-----------|------------|----------|---------------------|----------------------|

Hib (PRP-OMP): Lot number- M034894 is a non-decremented dose

1. Non-decremented doses can be discovered via the patient detail report. Please refer to the Patient Detail Report Guidelines for reference.
 - a. Example: Patient received a private dose of Hib (PRP-OMP), Lot Number: M034894, which did not decrement. This patient was VFC eligible.
2. Search for the Patient using either the Patient ID or Patient First Name, Last Name and Date of Birth
3. Under Vaccinations
 - a. Select: VIEW/ADD

4. Vaccinations highlighted in Blue are vaccinations given at your facility. Find the vaccination date associated with the non-decremented dose and select the vaccine.

| | 12 months | 10 months | | | |
|-----|-----------------------|------------------------|------------------------|-------------------------|-------------------------|
| Hib | 04/30/2014 9 weeks | 06/11/2014 3 months | 07/16/2014 4 months | 11/10/2016 32 months | 02/16/2017 35 months |

5. After you select the vaccine, edit the record to associate the vaccine with the patient. Under the Vaccination Detail the Funding Source is missing.

Hib (PRP-OMP) dose, Lot Number: M034894 is now Decrement

Part 3: Replacing Doses Back After Borrowing has Occurred

Anytime a Private or VFC dose is borrowed, a Vaccine Borrowing Report needs to be submitted. This can be sent to your VFC Field Representative, Emailed to immunize@isdh.in.gov or Faxed to 317-233-3719.

1. Complete the Vaccine Borrowing Report

Facility Name:
Pin #:

VACCINE BORROWING REPORT

VFC-enrolled providers are expected to manage and maintain an adequate inventory of vaccine for both their VFC and non-VFC-eligible patients. Planned borrowing of VFC vaccine including the use of VFC vaccine as a replacement system for a provider's privately purchased vaccine inventory is not permissible.

VFC-enrolled providers must ensure borrowing VFC vaccine will not prevent a VFC-eligible child from receiving a needed vaccination.

COMPLETE THIS FORM WHEN:

- A dose of VFC vaccine is administered to a child NOT eligible for VFC
- A dose of privately-purchased vaccine is administered to a VFC-eligible child

HOW TO COMPLETE THIS FORM:

- Enter information on each dose of vaccine borrowed in a separate row in the Vaccine Borrowing Report Table.
- All columns must be completed for each dose borrowed.
- The provider must sign and date at the bottom of this report.
- Enter the corresponding reason code in column F of the Borrowing Report Table on page 2.
- Enter details of reason in Column F if an Other code (7Other or 13Other) is entered in the Vaccine Borrowing Report Table.
- Do not forget to record the lot number of the vaccine borrowed and the vaccine returned, and to update your inventory in CHIRP.

| Reason for Vaccine Borrowing and Replacement Coding Legend | | | |
|--|--------|--|---------|
| Reason for Borrowing VFC Dose | Code | Reason for Borrowing Private Dose | Code |
| Private vaccine shipment delay (vaccine order placed on time/delay in shipping) | 1 | VFC vaccine shipment delay (order placed on time/delay in shipping) | 8 |
| Private vaccine not usable on arrival (vials broken, temperature monitor out of range) | 2 | VFC vaccine not usable on arrival (vials broken, temperature monitor out of range) | 9 |
| Ran out of private vaccine between orders (not due to shipping delays) | 3 | Ran out of VFC vaccine between orders (not due to shipping delays) | 10 |
| Short-dated private dose was used for VFC eligible child | 4 | Short-dated VFC dose was used for child not eligible for VFC program | 11 |
| Accidental use of Private dose for VFC eligible child | 5 | Accidental use of a VFC dose for a child not eligible for the VFC program | 12 |
| Replacement of Private dose with VFC when insurance plan did not cover vaccine | 6 | Other - Describe: | 13Other |
| Other - Describe: | 7Other | | |

WHAT TO DO WITH THIS FORM:

- Providers must submit their borrowing form to the Immunization Division by fax monthly: 317-233-3719. Completed forms must be retained as a VFC program record and made available to the State/Local or Territorial Immunization Program upon request.

Ensure that the Facility Name **and** VFC PIN # are included on the borrowing form. A Private vaccine was given to a VFC eligible patient, you will select one Code from 1-7. In the example provided Code 5- Accidental use of a Private dose for a VFC eligible child. All borrowed doses should be replaced as soon as possible. Once the dose has been replaced, send in the Vaccine Borrowing Report.

| 02/17/2017 | -1 | | Restock Private Inventory from Public | 06/26/2017 11:43:46 AM |

Back

If Private Inventory is not recorded in CHIRP under the Reconciliation Page, you can stop here.

However, if you manually enter administered doses or track Private Inventory in CHIRP. The newly borrowed Public Dose to Private Inventory needs to be entered into CHIRP as a Private Dose.

Part 4: Adding Newly Paid-Back VFC Dose to Private Inventory

This is the final step in reconciling your inventory. When you pay back inventory with a new lot number you will need to add a lot into your inventory under the correct Funding Source.

1. Search for any combination of the vaccine lot number, manufacturer, vaccine, etc.
 - a. Vaccine: Hib (PRP-OMP)
 - b. Manufacturer: MERCK- MSD
 - c. Lot Number: M027884

2. The Public Dose will appear; however, you need to add this dose in as a Private vaccine dose.
